These documents are available free of charge from the management company to the ICAV, IQ EQ Fund Management (Ireland) Limited (the "Manager") (iqeq.com). A summary of the rights of investors and potential investors is available in the prospectus of the ICAV, in the section "IMPORTANT INFORMATION". The Manager may decide to terminate the arrangements made for the marketing of the fund in accordance with the provisions of the management agreement between the ICAV and the Manager.*

PAST PERFORMANCE MAY NOT BE A RELIABLE GUIDE TO FUTURE PERFORMANCE. *Inherent in any investment is the potential for loss. Investors could lose all or substantially all of their investment. Investing based on ARGA's strategies is subject to a variety of risks described in the prospectus of the ICAV, the supplement with respect to any fund for which a strategy is used and the fund's Key Investor Information Document (KIID). An investment in an ARGA UCITS fund may be subject to sudden and large falls in value. There is a possibility that an investor could lose the total value of their initial investment in the fund. Changes in exchange rates may have an adverse effect on the value price or income of the fund. The difference at any one time between the sale and repurchase price of a share in a fund means that an investment in such fund should be viewed as medium term to long term.*

Any index referenced herein is used for comparative purposes only. An index cannot be invested in directly. Any composite referenced herein reflects the deduction of all fees and expenses, and reinvested dividends (different share classes may vary). A composite is significantly more concentrated in its holdings and has different region and sector weightings than the Index. As a result, a composite's performance will be different from and at times more volatile than that of the Index.

For the purposes of Article 6 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector, while ARGAs considers sustainability risks in respect of ESG factors, the composite is focused on investing primarily in equity and equity linked securities of issuers (such as debentures, notes or preferred stock) that are traded on exchanges or recognised markets or over the counter, in both developed and emerging markets.

The fees and charges paid by any ARGAs UCITS fund will reduce the return on your investment. Certain costs paid by a fund will be charged in USD and exchange rate fluctuations may cause these costs to increase or decrease when converted into your local currency.

The ARGAs UCITS funds may be exposed to the creditworthiness and performance of one or more counterparties. Although the funds will strive to reduce counterparty credit risk, there is no assurance that the counterparty will not default or that the funds will not sustain losses as a result. The funds may at times invest in securities that are inherently less liquid and more difficult to sell. The funds invest in equities globally and are, therefore, exposed to fluctuations in currency exchange rates as well as unstable currencies in certain developed and emerging markets. The performance results of participatory notes may not replicate exactly the performance of the issuers that the notes seek to replicate due to transaction costs and other expenses. Investing in emerging markets involves a greater degree of risk than investments in more developed countries. The funds' success may be affected by general economic and market conditions that could adversely impact the funds' profitability or result in losses. For a full list of possible risk factors please see section entitled "Risk Factors" set on in the Prospectus and Supplement of the applicable fund.

The tax treatment of the gains and losses made by the investor and of distributions received by the investor depends on the individual circumstances of each investor and may imply the payment of additional taxes. Before any investment is made in a fund, investors are urged to consult with their tax advisors for a complete understanding of the tax regime which is applicable to their individual case.

Historical returns are no guarantee of future returns. The money placed in a fund can both increase and decrease in value and you may not get back the full invested amount.
