Portfolio Commentary for the month of January 2021:

The portfolio lagged the benchmark in January as the investors continue to favor value stocks over growth stocks. This trend has started in Q4 2020. The positive performance contribution from stocks in the healthcare and IT sectors were more than offset by the laggards in the industrial, consumer staple and consumer discretionary sectors.

Market Outlook:

The quarter... In Q4/20, the ARI ACWI ex-US strategy lagged the MSCI ACWI ex-US Index by 695 bps, due mainly to an equity market rotation in which investor preference shifted from growth stocks to value stocks. The sector allocation and stock selection contributed equally to the underperformance.

ARI's View...with the arrival of COVID vaccines, an economic recovery is now on the horizon, although it might take as long as one year for the developed economies as the herd immunity is unlikely to be reached before summer at the current vaccination rates. It is becoming more evident by now that some of the recent dynamics such as working from home, ecommerce uptake and a reduction in business travel are likely to become more permanent and therefore change the fundamental structure of the economy. The only large economy that managed to grow in 2021 was China. Similar to Q3, we view that the high valuation remains the main reason for our unfavorable view of the current risk/reward of equity markets.

Risks ARI is Monitoring... 1. Sustained high unemployment rates and the state of the labor market, 2. the virus' potential permanent impact, 3. market dislocation due to massive liquidity injections by central banks, 4. US-China relations, 5. rapidly increased sovereign debt levels, 6. SME bankruptcy rates and default risks related to the commercial property and 7. overall equity valuations in the developed markets.

Portfolio Positioning... we have added weights of companies that are able to deliver revenues and earnings growth under the current uncertain economic conditions.
